

REACH Compliance Statement

Avalanche Technology is committed to conducting our worldwide operations in an environmentally, socially, and ethically responsible manner, complying with all applicable laws and regulations of those countries where we do business. This commitment includes the safe use and identification of chemicals per the applicable requirements of the European Community regulation number 1907/2006, which is known as REACH (Registration, Evaluation, Authorization and Restriction of Chemicals).

All Avalanche technology products are “articles”, as defined in Article 3(3) of the REACH regulations, which do not release substances under normal use. Registration of substances used in the manufacture of articles does not apply to our products as we do not manufacture products or import or use chemicals in our European operations.

The compliance status of the products was confirmed based on the latest 209 substances as updated by ECHA on June 25, 2020. Please refer to the following ECHA list for the most current candidate list of substances:

<http://echa.europa.eu/candidate-list-table>.

Based on the material content certifications provided by Avalanche technology’s suppliers, none of these substances are present in the materials we use in our products, including packing and shipping materials. Therefore, Avalanche technology products do not contain any of these SVHC in excess of 0.1% by weight. Avalanche technology Technologies will continue to comply with REACH requirements and notify customers of any change in article content.

VP of Quality, Avalanche Technology
